Program Goals and Objectives:

Promote environmental awareness and stewardship to encourage campers to learn about natural resources in their area and conservation of these resources, as well as the rivers and streams that lead to the Chesapeake Bay, and the problems associated with pollution.

Foster an environment that is safe and interactive for campers to not only see and learn, but to touch and experience nature firsthand.

Provide campers with skills in science and social studies in accordance with Virginia Standards of Learning for their grade level as well as incorporate basic scientific and problem solving skill development.

Provide fun interactive games and crafts while making new friends.
