

SPOTSYLVANIA COUNTY WATER MAIN FLUSHING NOTICE

(SEE IMPORTANT INFORMATION ON REVERSE SIDE)

NOTICE ANNUAL WATER MAIN FLUSHING PROGRAM

Spotsylvania County's Utilities Department will begin its Annual Flushing Program on **March 20, 2020** and will continue through **May 2020**. Crews will work each day, Monday through Friday (excluding holidays) from 7:30 a.m. until 3:30 p.m. Typically, entire subdivisions are completed daily.

To check when crews are scheduled to flush in your neighborhood and their progress, please refer to the County's website: www.spotsylvania.va.us or you may call (540) 507-7300 – Option 5. We also encourage you to register at www.spotsyalert.com to receive alerts and emergency notifications.

The Annual Flushing Program helps to clean sediments from our water mains that may have accumulated over the previous year. It also allows us the opportunity to check and operate many of our fire hydrants to determine if maintenance is required.

During the flushing of the water mains in your immediate area, you may notice a temporary reduction of water pressure or some discoloration in your tap water. This discoloration condition is not harmful and should clear up quickly by leaving your cold water running for approximately 15 minutes, once flushing in your neighborhood is complete. **We suggest you do not wash your clothes during these operations.**

If you notice continued low water pressure or severe discoloration, please call the Department of Utilities at (540) 507-7300 or After-Hours/Weekends/Holidays, (540) 507-7340 or (540) 507-7350.

Additionally, to reduce/prevent erosion problems, please check your culvert pipes and ditches to make sure they are free of leaves and debris.

We appreciate your cooperation and we will endeavor to keep any inconvenience to a minimum.
