U-Haul is at a distinct disadvantage due to the fact that their location is well below the highway and their building is mostly hidden by trees. Therefore, we have recommended they add a 75' pylon sign which can be more easily seen from the highway.

Our initial crane test showed that anything less than this height would be difficult to see due to the trees which are between I-95 and their location.

We are recommending a pylon with 6'-1" H x 6' W fabricated sign cabinets with LED illumination that spell out "U HAUL". Below that sign, we're recommending a 6'-1"H x 12' W illuminated cabinet which can be manually used to relay any new messages or offerings.

Please feel free to contact me at (804) 543-5513 with any questions.

Thank you,

Jonathan Dabney
