

## Acknowledgements

Hayes, Seay, Mattern & Mattern, Inc. (HSMM) prepared the Water/Sewer Master Plan Revisions 2002, with significant technical input and direction from the Spotsylvania County Utilities and Planning Departments. By subcontract to HSMM, Gannett Fleming, Inc. prepared the water distribution and treatment portions of the Plan. For water distribution analysis, Gannett Fleming updated an existing water distribution model they had previously prepared for the combined Spotsylvania County and City of Fredericksburg water systems. For evaluation of the existing City of Fredericksburg Hazel Run interceptor system, HSMM utilized the services of Whitman, Requardt and Associates, who had previously evaluated the City of Fredericksburg sewage collection system. Design parameters and cost data for the Massaponax wastewater treatment plant expansion projects were provided by O'Brien & Gere Engineers, Inc.
